Composition comments

Natural dry Ball Clay. Ball Clay is a kaolinitic sedimentary clay of natural origin. Ball Clay consist primarily of kaolin and quartz with variable proportions of other minerals. A proportion of the quartz may become available in the respirable fraction. The level of exposure to respirable silica will depend on the actions performed on the product during handling and use. Exposure levels should, therefore, be measured during use, in comparision to relevant occupational exposure limits, as exposure cannot be determined from bulk product analysis.

3.0 HAZARDS IDENTIFICATION

Physical and chemical hazards:

Human health:

Not regarded as a health or environmental hazard under current legislation.

Wet substance spillage can constitute a slipping hazard.

Long term exposure to any respirable mineral dust could cause effects in the respiratory system. Airbourne dust may cause irritation to the eyes. In 1997, IARC (the International Agency for Research on Cancer) concluded that crystalline silica inhaled from occupational sources can cause lung cancer in humans. However it pointed out that not all industrial circumstances, nor all crystalline silica types, were to be incriminated. (IARC Monographs on the evaluation of the carcinogenic risks of chemicals to humans, Silica, silicates dust and organic fibres, 1997, Vol. 68, IARC, Lyon, France). In June 2003, SCOEL (the EU Scientific Committee on Occupational
Exposure Limits) concluded that the main effect in humans of the inhalation of respirable crystalline silica dust is silicosis. „There is sufficient information to conclude that the relative risk of lung cancer is increased in persons with silicosis (and, apparently, not in employees without silicosis exposed to silica dust in quarries and in the ceramic industry). Therefore preventing the onset of silicosis will also reduce the cancer risk...” (SCOEL SUM Doc 94-final, June 2003). There is a body of evidence supporting the fact that increased cancer risk would not be limited to people already suffering from silicosis. According to the current state of the art, worker protection against silicosis can be consistently assured by respecting the existing regulatory occupational exposure limits.

4.0 FIRST-AID MEASURES

Inhalation: Move into fresh air and keep at rest. Get medical attention if any discomfort continues.
Ingestion: Rinse mouth thoroughly. Get medical attention if any discomfort continues.
Skin contact: Wash skin with soap and water.
Eye contact: Rinse with water. Contact physician if discomfort continues.

5.0 FIRE-FIGHTING MEASURES

Extinguishing media: The product is non-combustible. Use fire-extinguishing media appropriate for surrounding materials.

6.0 ACCIDENTAL RELEASE MEASURES

Personal precautions: Wear protective clothing as described in section 8 of this safety data sheet.
Environmental precautions: Avoid discharge into drains, water courses or onto the ground.
Spill clean up methods: Remove spillage with vacuum cleaner. If not possible, collect spillage with shovel, broom or the like.

7.0 HANDLING AND STORAGE

Usage precautions: Avoid handling which leads to dust formation.
Storage precautions: Store in a dry covered area.

8.0 EXPOSURE CONTROLS/PERSONAL PROTECTION

Ingredient comments

WEL = Workplace Exposure Limits.

Protective equipment

Engineering measures: Provide adequate ventilation. Observe Workplace Exposure Limits and minimise the risk of inhalation of dust.

Respiratory equipment: No specific recommendation made but respiratory protection must be used if the general level exceeds the recommended Workplace Exposure Limit.

Hand protection: For prolonged or repeated skin contact use suitable protective gloves.

Eye protection: Wear approved safety goggles. Contact lenses should not be worn when working with this product.

Hygiene measures: Use appropriate skin cream to prevent drying of skin. When using do not eat, drink or smoke. Wash at the end of each work shift and before eating, smoking and using the toilet.

9.0 PHYSICAL AND CHEMICAL PROPERTIES

<table>
<thead>
<tr>
<th>Property</th>

<tr>
<td>Appearance</td>
<td>Granular or powder.</td>
</tr>
<tr>
<td>Colour</td>
<td>White / off-white.</td>
</tr>
<tr>
<td>Odour</td>
<td>Almost odourless.</td>
</tr>
<tr>
<td>Solubility</td>
<td>Insoluble in water.</td>
</tr>
<tr>
<td>Relative density</td>
<td>2.6 20 °C</td>
</tr>
</tbody>
</table>

10.0 STABILITY AND RACTIVITY

Stability: Stable under normal temperature conditions and recommended use.

11.0 TOXICOLOGICAL INFORMATION

General information: This product has low toxicity. Only large volumes may have adverse impact on human health.

Inhalation: Dust may irritate respiratory system or lungs.

Ingestion: No harmful effects expected in amounts likely to be ingested by accident.

Skin contact: Prolonged contact may cause dryness of the skin.

Eye contact: Particles in the eyes may cause irritation and smarting.

12.0 ECOLOGICAL INFORMATION

Ecotoxicity: The product components are not classified as environmentally hazardous. However this does not exclude the possibility that large or frequent spills can have a harmful or damaging effect on the environment.
LC₅₀, 96 Hrs, FISH mg/l: > 1.000
EC₅₀, 48 Hrs. DAPHNIA, mg/l: > 1.000
IC₅₀, 72 Hrs. ALGAE, mg/l: > 1.000

Mobility: The product is insoluble in water.
Bioaccumulation: The product does not contain any substances expected to be bioaccumulating.
Degradability: The product is not biodegradable.

13.0 DISPOSAL CONSIDERATIONS

General information: This mineral can be disposed of as a non toxic/inactive material in approved landfill sites in accordance with local regulations.

14.0 TRANSPORT INFORMATION

General: The product is not covered by international regulation on the transport of dangerous goods (IMDG, IATA, ADR/RID).

15.0 REGULATORY INFORMATION

Risk phrases: NC Not classified.
Safety phrases: NC Not classified.
Statutory instruments: Safety data sheets for substances and preparations. Classification and labelling of substances and preparations dangerous for supply. Workplace Exposure Limits EH40.
Approved code of practice: Guidance notes:

16.0 OTHER INFORMATION

Revision comments: Section 2 adjusted to include additional phrases regarding health affects of quartz. Section 3 adjusted to include dust recommendations.
Rev. No./Rpl. SDS generated: 2.
Risk phrases in full: NC Not classified.

The information contained in this Safety Data Sheet supersedes all previous such sheets and is based upon the Company's current knowledge at the data of preparation. It is given in good faith, without any warranty, expressed or implied, regarding its correctness or completeness. The conditions or methods of handling, storage, use or disposal of the product are beyond our knowledge. It is the sole responsibility of the user to take all precautions required in handling the product. The information contained in this Material Safety Data Sheet does not constitute an assessment of workplace risks.
